Behavioral issue (please explain below)					Family Issues/Conflict				
Adjustment Difficulties to current living environment					Discharge Difficulties due to Psychiatric Issues				
Adverse Status Change in nutrition, activity participation, vegetative functions, sleep					Other				
Explanation:									
<p>Treatment Description. In making this referral 6M GERIATRICS & HOSPITAL MEDICINE is requested and authorized by order of the attending physician to use any necessary diagnostic tools to diagnose and treat the above named patient as a psychiatric and psychological/psychosocial referral (unless otherwise stated). In the case of psychiatric evaluation, treatment might include the prescription of psychotropic medication or if the patient is already receiving psychotropic medication, treatment might include its continuation. The psychiatric consultant will determine whether medication is or remains necessary based upon a thorough evaluation of the patient's past and recent history and behavioral status (corresponding with one or more specific psychiatric diagnosis and targeted symptoms). A determination to prescribe or continue such medication will be further based on careful consideration of the possible benefits/intended outcomes of treatment, possible risks and side effects, alternative forms of treatment, and the possible consequences of not receiving such medication treatment. It is important to understand that the consequences of the use of psychotropic medication cannot always be predicted for any given individual and there is a chance the patient may not react favorably to its administration. There is a possibility that the medication may need to be changed or the dose adjusted over time. It is also important to understand that you can at any time withdraw your consent and request that the psychotropic medication be discontinued. A facility representative can contact you and advise you of any new medication treatment or changes to the current medication regimen following the initial evaluation by the psychiatric consultant. In the case of psychological or psychosocial treatment, services might include an evaluation, psychotherapeutic interventions and behavioral planning, testing and continuing follow-up, as needed.</p>									
<p>Consent to Release Health Information. The Consenter designated below authorizes 6M GERIATRICS & HOSPITAL MEDICINE to release any personal health information pertaining to diagnosis and treatment to any insurance company or third party who undertakes responsibility for 6M GERIATRICS & HOSPITAL MEDICINE's professional service fees. The Consenter hereby authorizes full payment of the insured portion of the charges to be paid directly to 6M GERIATRICS & HOSPITAL MEDICINE and understands that any portion of the fee not covered by insurance is the responsibility of the patient.</p>									
<p>Statement of Consent.</p> <p>I DO CONSENT to the treatment designated herein, including necessary recommended psychotropic medication treatment other than _____ (no exclusion unless specified). I give consent voluntarily and without coercive or undue influence. I understand this consent may be revoked at any time.</p> <p>I DO NOT CONSENT to the treatment designated herein. I understand that, as a result of my refusal to consent, I absolve the facility and its employees and contractors from any liability or responsibility for anything that might happen to me as a result of this refusal. This refusal to consent also may make it necessary to transfer me to another healthcare facility as a result of my psychiatric condition.</p>
